Preceptible Growth of the Dis inclination to Deal in

NEW YORK, January 20.—There was perceptible growth to-day of the dis-lination to deal in stocks, which is been increasing for several days st. The first hour of the spurt of tivity scemed to be due to hopeful sting operations by the professional ment. With the failure of these orts to arouse any interest or to tract any foreign interest, the mart subsided.

To-sign the New York Central direc-

attract any foreign interest, the market subsided. To-day the New York Central directors adjourned once more, with the amountement that only routine matters had been considered. This puts off again the supposed entry of E. H. Harriman and associates into the directorate, which has said to be imminent many times. There was some disappointment also over the non-action of the New York Public Service Commission on the Eric application for an issue of \$30,000,000 bonds.

There was a reversal of sentiment over the remarks of the president of the Interborough-Metropolitan to his stockhoiders regarding the probable purchase of the Metropolitan Street (allway, and the contribution of funds for that purpose was presented as a privilege rather than as assessment. The dectine in Amalgamated Copper was a response to the reports of untavorable conditions in the coppering expeditions in the coppering le. Excepting special cases, the se changes proved insignificant, onds were irregular; total sales, par ne. \$5.581,000.
